My name is Tsetsejgargal. I'm Mongolian. My major is Computer Graphics Design. Now I'm studying in the Iwate university the second year. I'm interested in virtual reality technologies and physical computing. Accordingly, I study and work with complex systems, behavior, algorithms, and software, and collaborates across many disciplines spanning video, sound, light, dance, software, online works, installations, and performances.

I enjoy and like to try everything I don't know. Nowadays I'm studying skateboarding by myself in my free time. Anyone who likes skateboarding can contact me.

I worked as an assistant teacher at the National University of Mongolia. I taught both programming and graphics lessons. It was a good experiment for me. I also worked as a graphic designer for some company too. So that, I became a person who loves to connect anyone who likes computer graphics and art things and change experiments and knowledge we have.

After I graduate my doctor's course I will go back to Mongolia and want to make a computer graphics company. Also, I will work at the National University of Mongolia as a teacher. I want to work with students and collaborate with new colleagues. Also, want to continue to touch and work with Japanese people.

Iwate seems like a hometown for me. Mongolia is colder than Japan. But Morioka's seasons are a little bit same with Mongolia's. In Japan, there are so many interesting and sweet foods makes me want to eat them. During the holidays I like to take a little trip to Japan. I always excited about every single trip. I want to travel more and eat more in Japan. So I'm really

enjoying my Japanese life.

岩手大学では工学研究科の博士課程でコンピューターグラフィックデザインを学んでいるツェツェゲーさん。将来は、コンピューターグラフィックの会社を立ち上げたいとのこと。カッコ良いですね～！盛岡の気候はモンゴルに少し似ているようなので、故郷のように感じているようです。これからのツェツェゲーさんの活躍に、期待が持てますね♪
